Dear colleagues,

This week is lost for me in the sense of work... As you know I have the last(?) loop of ChT in the HUC..

Sorry for this delay. I shift my active work till next week...

I have some clear ideas of what to do...

I think you may prepare the draft without me... Later I can join you. If it will be too late,,, We can describe results in another journal... for sure,with your participation... now it's only ''emergency'' option.

My home computer has some problems, it does not work properly... here are a few versions of the python. I try to solve the problem...

It lost a camera, too.

... but it is a different story. I wait for Victor.

Sorry again for a delay,

Keep in touch,

yp

Received 2025 January 24; revised 2025 March 23; accepted 2025 March 28; published 2025 April 29

- Optical part of the theory fails again for the metal-poor T/Y population

- New species, better spectrum, new physical properties constrains from the model...

- Jupiter shadow as a window...

Dear colleagues,

I am home. You are invited to look at me/speak about science later today between 4:0pm - 5 pm, may be later... who can...

Formally today is the birthday of my daughter Mariya, so there will be a cake :)

C u,

yp
